“Influence of EU enlargement on planning and operation of new members power networks”

(PSE - Operator S.A. , Poland)

Abstract

The article presents the overview of impact of the European Union enlargement on the new members power grids. The areas of influence can be divided into two categories: planning and operation. In the planning part the novelisation of the Decision 1229/2003/EC & TENs and study of the UCTE and CIS grid interconnections will be presented. Operation part covers project of directive of infrastructure and security, harmonization of technical standards and the issues of resynchronization of the UCTE second zone.
