Opportunities for International Collaboration in Support of Electrification in Africa

Mr. Paul Johnson

Exkom , South Africa

Abstract

This presentation will explore the possible synergies that could develop from the partnership between IERE and PIESA in the areas of technology exchange and capacity building in furthering the aims of PIESA to stimulate accelerated electrification of the region. Proposals for specific projects that could be developed will be offered for debate, with a view to establishing one or more legacy projects from the PIESA-IERE Africa Forum.
