

## S1-4 SGCC Progress in Smart Grid Standardization

Dr. FAN Jianbin

State Grid Corporation of China

**Keywords:** SGCC, Smart Grid, Standardization

**Abstract:**

This presentation firstly presents the SGCC framework and roadmap for smart grid standards, in which the 4 levels of standards are intensively described. Meantime, this part also gives some information on the development of smart grid industrial standards and national standards. Secondly, the international standardization activities of SGCC are introduced such as joining the international standardization organization, submitting the NPs, etc. The next step of SGCC on smart grid standardization is addressed in the last section, including the development of SGCC corporation standards, national efforts and international standardization.
